

Task 2: Data Visualization and Storytelling

Objective: Sales data ko visualize karke ek compelling story present karna, taaki business insights clearly samajh aa sakein.

Tool Used: Power BI

Process (Kaise Kiya)

- 1 **Data Import** — Sales dataset (Mobile Sales / Superstore data) ko Power BI mein load kiya.
- 2 **Data Cleaning** — Columns ko check karke unnecessary blanks aur duplicate entries remove ki.
- 3 **KPI Cards** — Total Sales, Total Average, Total Count jaise key metrics ko top pe cards ke through highlight kiya.
- 4 **Chart Selection** — Alag-alag insights ke liye alag chart types use kiye: City-wise sales ke liye Map visual, Month-wise trend ke liye Line chart, Rating status ke liye Bar chart, Payment method distribution ke liye Pie chart, Mobile model-wise sales ke liye Horizontal bar chart, Day-wise sales pattern ke liye Area chart.
- 5 **Interactivity** — Month, Mobile Model, Payment Method, aur Brand ke slicers/filters add kiye taaki user apne hisaab se data explore kar sake.
- 6 **Insights & Context** — Har chart ke saath ek short insight likha (jaise 'Galaxy Note 20 top-selling model hai', 'Thursday peak sales day hai') taaki sirf raw chart na ho, balki story bhi bane.
- 7 **Summary Slide** — Ek separate summary page banayi jisme key takeaways bullet points mein diye — jaise top city, best month, weak areas, aur recommendations.

Key Insights

- Total sales **₹59M** across **291 transactions**, average ticket size **₹40.98K**
- **Mumbai & Bhopal** lead in city-wise sales
- **March** best month, **February** weakest
- **33.5% "Average" ratings** — customer satisfaction improve karne ki zaroorat
- **Cash & UPI** dominant payment modes (~52% combined)
- **Galaxy Note 20** top-selling model
- **Thursday** peak sales day, weekends slow

Outcome

Is dashboard se business ko clearly pata chalta hai ki kaunse products, cities, aur days sabse zyada perform kar rahe hain, aur kahan improvement ki zaroorat hai (jaise average ratings). Isse data-driven decision-making aasan ho jaati hai.
